Summary

Software Engineer with 3.4+ years of experience building scalable frontend architectures, microfrontends, and cloud-native applications. Experienced in integrating HubSpot and Salesforce CRMs, optimizing performance, and leveraging AWS services. Salesforce Certified Developer and AWS Certified Cloud Practitioner.

Technical Skills

Frontend & State: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML, Tailwind CSS, Material UI, Redux

Bundling & Architecture: Webpack, Module Federation, Microfrontends, System Design, Scalable Systems

Tools: Git, Postman, Docker, Jira, Jest, React Testing Library, AWS CodeArtifact, Chrome DevTools

Programming & API: JavaScript, TypeScript, Python, GraphQL, REST

Cloud: AWS (EC2, S3, IAM, CloudWatch, RDS, VPC, Shared Responsibility Model, Monitoring & Logging)

Practices: Agile, CI/CD, Performance Optimization, Test-Driven Development (TDD)

Experience

Data Axle

Pune

Software Engineer

Jul 2023 – Present

- Implemented a **microfrontend architecture** using **Webpack Module Federation** in a large-scale **Nx monorepo**, enabling independent deployments and reducing release cycle time by **25%**.
- Integrated **HubSpot and Salesforce CRM systems**, automating lead capture and synchronization workflows and reducing manual data entry by **80%**.
- Developed **10+ reusable React.js components** using **Material UI**, improving UI performance and increasing user engagement by **35%**.
- Built **Next.js SSR pages and API routes** to improve SEO and application performance, reducing first-page load time by **40%**.
- Refactored **50+ legacy React components** into modern **hooks-based architecture** with improved **state management patterns**, reducing code complexity by **20%**.
- Designed a shared **UI component library** used across **3+ internal applications**, ensuring design consistency and reducing duplicate code.
- Architected frontend system design for high-performance React applications, leveraging **lazy loading, code splitting, and SSR**, improving **Core Web Vitals (LCP, FCP)** by **35%** and reducing **bundle size** by **30%**.
- Implemented **AWS CodeArtifact** for secure package management and automated **CI/CD authentication** across microfrontend services.

Data Axle

Software Developer Intern, Remote

Feb 2023 – Jun 2023

- Developed 3 interactive React.js dashboards with Material UI, enabling real-time analytics for 50+ sales representatives.
- Contributed to Jira-based **Agile** sprints, delivering features 10% faster through cross-team collaboration.

Projects

- Microfrontend CRM Dashboard with CRM Integrations** Jun 2025 – Nov 2025
Built a microfrontend CRM dashboard (React.js, Next.js, Module Federation) with HubSpot and Salesforce integration, improving lead syncing workflows and cutting deployment downtime by 30%.
- SRE Monitoring Tool** Apr 2024 – Jul 2024
Built an internal API monitoring tool with React.js, Django, GraphQL, PostgreSQL, and MUI; improved issue detection and reduced resolution time by 40%.
- Personalized Email Generation Platform** Jul 2023 – Aug 2023
Created an AI-powered email generator using OpenAI APIs to produce context-aware, personalized marketing emails for CRM-captured leads (HubSpot, Salesforce), improving campaign CTR by 18%.

Certifications & Awards

2026: AWS Certified Cloud Practitioner – View Credential

2025: Salesforce Certified JavaScript Developer I – Verify Credential

2025: Salesforce Certified Platform Developer I – Verify Credential

2025: Received the **Starlight Award (Data Axle)** for excellence in CRM integration and frontend architecture.

Education

Lakshmi Narain College of Technology

B.Tech in Computer Science (CGPA: 8.46)
